

TAFLEN WYBODAETH - INFORMATION SHEET

DWARF FRENCH BEANS

Sowing date: An easy to grow nitrogen-fixing crop that grows best in deep soils rich in organic matter. Frost sensitive. Successive sowings can be made from the end of May to the end of June aiming for a plant density of 400,000/ha. Sow 20-30mm deep.

Nutrient requirements: Approximately 40-50Kg/ha of nitrogen should be applied in the seedbed to ensure availability during the early stages of growth. Apply maintenance levels of phosphate and potash.

Weeds, diseases and pests: A range of pesticides is available to deal with weed competition and common pests.

Harvesting date and method: From early August onwards. Picked by hand.

Uses: The crop lends itself to farm gate sales; 'pick your own' type operations (one of several picking options) and freezing.

Processing and the market: Processing opportunities for growers. Demand for locally produced vegetables is increasing.

FFA BYR FFRENGIG

Sefydlu: Cnwd hawdd i'w dyfu sy'n cynhyrchu nitrogen ac sy'n tyfu orau mewn priddoedd dwfn â llawer o ddeunydd organig. Sensitif i rew. Gellir hau mewn cyfres o ddiwedd Mai i ddiwedd Mehefin, gan anelu at ddwysedd poblogaeth o 400,00/ha. Hau 20-30mm o ddyfnder.

Anghenion maeth: Dylid gwasgaru oddeutu 40-50Kg/ha o nitrogen yn y gwely pridd i sicrhau cyflenwad digonol yn y cyfnod dechreuol. Angen lefelau cynnal o ffosffad a potash.

Chwyn, afiechydon a phla: Mae amrediad o blaladdwyr ar gael i ddelio gyda cystadleuaeth chwyn a phla cyffredin.

Dyddiad a dull cynaeafu: O ddechrau Awst ymlaen. Pigo gyda llaw.

Defnydd: Gellir tyfu ar gyfer gwerthiant fferm neu ar gyfer busnes 'pigo'ch hun' (ble fo'n un o nifer o lysiau/ffrwythau i'w pigo) a chynnyrch wedi'i rewi.

Prosesu a'r farchnad: Cyfleon prosesu i dyfwyr. Mae galw cynyddol am lysiau wedi'u tyfu'n lleol.
